INTERNATIONAL PROCESS SOLUTIONS A TruMetric Family](#)

CALIBRATION

Valid To: [See Table Below](#)

Certificate Number: 2348.01

In recognition of the successful completion of the A2LA evaluation (including an assessment of the organization's compliance with A2LA's – R205 Calibration Program Requirements), accreditation is granted to this laboratory at the locations listed above as well as the branch laboratory location listed below to perform the following calibrations^{1, 8}:

I. Acoustical Quantities

Parameter/Range	Frequency	CMC ^{2, 9} (±)	Comment	Location ¹⁰
Sound Pressure Level – Measuring Equipment	114 dB @ 251.2 Hz	0.26 dB	Sound level calibrator	ATL
	94 dB @ 1 kHz	0.65 dB		HSV
	114 dB @ 1 kHz	0.97 dB		
Up to 150 dB Measure & Measuring Equipment	(19 to 16 000) Hz	0.25 dB	Acoustics calibrator	RFD
	(16 000 to 20 000) Hz	0.32 dB		

II. Chemical Quantities

Parameter/Equipment	Range	CMC ² (±)	Comment	Location ¹⁰
pH Meters ³	4 pH	0.025 pH	pH buffer solutions	TPA, RDU, DFW
	7 pH	0.036 pH		
	10 pH	0.069 pH		
	4 pH	0.039 pH		ATL, SFL
	7 pH	0.03 pH		
	10 pH	0.035 pH

¹ This laboratory offers commercial calibration service and field calibration service.

² Calibration and Measurement Capability Uncertainty (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. CMCs represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of $k=2$. The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.

³ Field calibration service is available for this calibration. Please note the actual measurement uncertainties achievable on a customer's site can normally be expected to be larger than the CMC found on the A2LA Scope. Allowance must be made for aspects such as the environment at the place of calibration and for other possible adverse effects such as those caused by transportation of the calibration equipment. The usual allowance for the actual uncertainty introduced by the item being calibrated, (e.g., resolution) must also be considered and this, on its own, could result in the actual measurement uncertainty achievable on a customer's site being larger than the CMC.

⁴ In the statement of CMC, L is the numerical value of the nominal length of the device measured in inches. R is the resolution of the unit under test. D is the numerical value of the nominal diameter of the device measured in inches, M represents mismatch, X is mass in gram and W is mass in pounds and F is length in feet.

⁵ This laboratory meets R205 – *Specific Requirements: Calibration Laboratory Accreditation Program* for the types of dimensional tests listed above and is considered equivalent to that of a calibration.

⁶ In the statement of CMC, percentages are of rdg unless otherwise noted.

⁷ The stated measured values are determined using the indicated instrument (see Comments). This capability is suitable for the calibration of the devices intended to measure or generate the measured value in the ranges indicated. CMC's are expressed as either a specific value that covers the full range or as a percentage or fraction of the rdg plus a fixed floor specification.

⁸ This scope meets A2LA's *P112 Flexible Scope Policy*.

⁹ The type of instrument or material being calibrated is defined by the parameter. This indicates the laboratory is capable of calibrating instruments that measure or generate the values in the ranges indicated for the listed measurement parameter.

¹⁰ The locations of the laboratories that can perform the calibrations are given by a three-letter code with valid to dates given in the table below:

¹¹ The name and contact information under each laboratory's address "below" represents the point-of-contact for that respective laboratory

¹² Due to its corporate scope nature all certificates are issued and shown under 2348.01, but locations perform their work individually.

CALIBRATION

Valid To: November 30, 2026

Certificate Number: 2348.01

In recognition of the successful completion of the A2LA evaluation process (including an assessment of the organization's compliance with A2LA's – R205 Calibration Program Requirements), accreditation is granted to this laboratory at the location listed above to perform the following calibrations^{1, 10}

I. Acoustical

Parameter/Equipment	Frequency	CMC ² (±)	Comments
Sound Level Meters ³ –			
94 dB	31.5 Hz to 12.5 kHz 16 kHz	0.31 dB 0.32 dB	Briel & Kjaer 4226
104 dB	31.5 Hz to 12.5 kHz 16 kHz	0.30 dB 0.34 dB	
114 dB	31.5 Hz to 12.5 kHz 16 kHz	0.30 dB 0.57 dB

CALIBRATION

Valid To: November 30, 2026

Certificate Number: 2348.01

In recognition of the successful completion of the A2LA evaluation process (including an assessment of the organization's compliance with A2LA's – R205 Calibration Program Requirements), accreditation is granted to this laboratory at the location listed above to perform the following calibrations ^{i, 10}:

I. Acoustical

Parameter/Equipment	Range	CMC ² (±)	Comments
Sound Level Meters 3 – 125 Hz to 4000 Hz	114 dB 104 dB 94 dB 84 dB 74 dB	0.26 dB 0.38 dB 0.39 dB 0.48 dB 0.86 dB	IET Labs 1986 omnical sound level calibrator

II. Chemical

Parameter/Equipment	Range	CMC ^{2, 8} (±)	Comments
Conductivity – Liquid Measuring Equipment ³	84 µS/cm 1413 µS/cm 12 880 µS/cm	0.8 µs/cm 4.0 µs/cm 50 µs/cm	Laboratory standard conductivity solution
Conductivity – Metal Measuring Equipment ³	9.33 %IACS 14.92 %IACS 25.80 %IACS 32.56 %IACS 44.92 %IACS 59.42 %IACS 100.97 %IACS	0.2 % IACS 0.35 % IACS 0.31 % IACS 0.38 % IACS 0.37 % IACS 0.47 % IACS 1.5 % IACS	Metal conductivity standards
Metal Conductivity Standards	Up to 102 %IACS	0.013 % + 0.2 % IACS	Conductivity meter
pH – Measuring Equipment ³	4 pH 7 pH 10 pH	0.01 pH 0.01 pH 0.01 pH	Buffer solutions

III. Dimensional

Parameter/Equipment	Range	CMC ^{2, 8} (±)	Comments
Angle Blocks	Up to 90°	0.0015°	Angle blocks
Angle Gages	Up to 120°	0.0058°	Video measuring system
Bore Gages/Intramics	(0.150 to 1.000) in (3.810 to 25.400) mm (1.000 to 2.000) in (25.4025 to 50.800) mm (2.000 to 3.000) in (50.8025 to 76.200) mm (3.000 to 4.000) in (76.2025 to 101.600) mm (4.000 to 5.000) in (101.6025 to 127.000) mm (5.000 to 6.000) in (127.0025 to 152.40) mm (6.000 to 7.000) in (152.4025 to 177.800) mm	(4.2 + 1.4D) μin (110 + 1.4D) nm (3.5 + 2.1D) μin (89 + 2.1D) nm (3.1 + 2.3D) μin (79 + 2.3D) nm (4 + 2D) μin (100 + 2.0D) nm (12 + 6D) μin (300 + 6.0D) nm (8 + 2D) μin (200 + 2.0D) nm (8 + 2D) μin (200 + 2.0D) nm	Lab Master, gage blocks, cylindrical rings

CALIBRATION

Valid To: March 31, 2027

Certificate Number: 2348.01

In recognition of the successful completion of the A2LA evaluation (including an assessment of the organization's compliance with A2LA's – R205 Calibration Program Requirements), accreditation is granted to this laboratory at the locations listed above as well as the satellite laboratory location listed below to perform the following calibrations^{1, 2, 8, 10}:

I. Dimensional

Parameter/Equipment	Range	CMC ^{2, 9} (±)	Comment
Outside Diameter (Pin and Plug Gages)	(0.01 to 0.25) in	30 µin	Comparison to PlugGage using Mitutoyo LSM-6100 laser scan micrometer
	(0.25 to 1) in	78 µin	Measurement heads

¹ This laboratory offers commercial calibration service and field calibration service, where noted.

² Calibration and Measurement Capability Uncertainty (CMC) is the smallest uncertainty of measurement that a laboratory can achieve within its scope of accreditation when performing more or less routine calibrations of nearly ideal measurement standards or nearly ideal measuring equipment. CMCs represent expanded uncertainties expressed at approximately the 95 % level of confidence, usually using a coverage factor of $k = 2$. The actual measurement uncertainty of a specific calibration performed by the laboratory may be greater than the CMC due to the behavior of the customer's device and to influences from the circumstances of the specific calibration.

³ Field calibration service is available for these calibrations. Please note the actual measurement uncertainties achievable on a customer's site can normally be expected to be larger than the CMC found on the A2LA Scope. Allowance must be made for aspects such as the environment at the place of calibration and for other possible adverse effects such as those caused by transportation of the calibration equipment. The usual allowance for the actual uncertainty introduced by the item being calibrated, (e.g., resolution) must also be considered and this, on its own, could result in the actual measurement uncertainty achievable on a customer's site being larger than the CMC.

⁴ The stated measured values are determined using the indicated instrument (see Comments). This capability is suitable for the calibration of the devices intended to measure or generate the measured value in the ranges indicated. CMCs are expressed as either a specific value that covers the full range or as a percent or fraction of the reading plus a fixed floor specification.

⁵ In the statement of CMC, percentages are to be read as percent of reading, unless noted otherwise.

⁶ In the statement of CMC, L is the numerical value of the nominal length of the device measured in inches, R is the numerical value of the resolution of the device under test in microinches, D is the numerical value of the nominal diameter of the device measured in inches.

⁷ This scope meets A2LA's *P112 Flexible Scope Policy*.

⁸ The type of instrument or material being calibrated is defined by the parameter. This indicates the laboratory is capable of calibrating instruments that measure or generate the values in the ranges indicated for the listed measurement parameter.

⁹ This laboratory meets *R205 – Specific Requirements: Calibration Laboratory Accreditation Program* for the types of dimensional tests listed above and is considered equivalent to that of a calibration.

¹⁰ Due to its corporate scope nature all certificates are issued and shown under 2348.01, but locations perform their work individually.

Accredited Laboratory

A2LA has accredited

TECHNICAL MAINTENANCE, INC. A TRUMETRIC FAMILY

for technical competence in the field of

Calibration

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 *General requirements for the competence of testing and calibration laboratories*. This laboratory also meets the requirements of ANSI/NC SL Z540-1-1994 and the requirements of ANSI/NC SL Z540.3-2006 and R205 – Specific Requirements: Calibration Laboratory Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 5th of September, 2025.

A blue ink signature of Mr. Trace McInturff.

Mr. Trace McInturff, Vice President, Accreditation Services
For the Accreditation Council
Certificate Number 2348.01
Valid to see scope of accreditation

For the calibrations to which this accreditation applies, please refer to the laboratory's Calibration Scope of Accreditation.

Accredited Laboratory

A2LA has accredited

MICRO QUALITY CALIBRATION, INC. A TRUMETRIC FAMILY

Chatsworth, CA

for technical competence in the field of

Calibration

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 *General requirements for the competence of testing and calibration laboratories*. This laboratory also meets the requirements of ANSI/NCSL Z540-1-1994 and the requirements of ANSI/NCSL Z540.3-2006 and R205 – Specific Requirements: Calibration Laboratory Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 30th day of January 2023.
